SPRINGER-MILLER SYSTEMS

SMS|Host Secure Data Extract

Springer-Miller Systems' Secure Data Extract (SDE) Export provides a framework to support automated, schedulable, one-way data exports from the SMS|Host PMS to complimentary hospitality systems.

Functionality

Acting as a protective gateway to your system, the SDE facilitates rapid, reliable and more frequent access to the data that hospitality product vendors need in order to provide services to you and your guests.

Utilizing a custom profile for each vendor, the SDE targets the databases they require and tracks all changes compressing, encrypting and transporting them automatically via a secure channel on a scheduled basis.

For those vendor products that would not realize the benefits of the real-time, two-way, event-triggered XML messaging functionality of SMS|Diplomat, the Secure Data Extract (SDE) Export can provide a safe, secure and very affordable alternative.

Scheduled File Export Benefits

By employing Springer-Miller's SDE, properties gain the following benefits:

- Security: increase security through the elimination of direct and uncontrolled external access to SMS|Host
- Protection: sensitive data are removed prior to export while encryption in transmission complies with data privacy requirements
- Reliability: consistent and dependable delivery of data
- Automation: fully autonomous processing means no manual intervention
- Speed: much smaller data feeds result in much shorter transmission periods
- Frequency: exports are available as often as 15 minute intervals
- Economy: the SDE supports multiple vendor exports from a single process
- Performance Safeguard: reliance on a sanctioned export protects against unintended performance degradation

Sanctioned Exports

SMS has a growing library of SDE Vendor Exports to which properties can subscribe. These support products addressing Owner and Member communications, Business Intelligence, Customer Relationship Management, Sales & Marking services Revenue Analysis and more. Please contact your Account Manager to validate your current vendor arrangements and help prevent any interruptions in service with your next update.

SPRINGER-MILLER SYSTEMS

SMS|Host Secure Data Extract

Software Requirements

The product is compatible with, and requires, the following versions of Springer-Miller's software:

- SMS|Host v22.7 or higher
- Multi-Interface Processor (see Exhibit A, Rev. 5.0, Section 3, page 8 for details)
- An approved SDE interface with a partner system.

Low Cost

The pricing for all SDE Exports has been set extremely low in order to minimize cost considerations and encourage properties to install valid and secure Exports for all of their non-interface 3rd party services:

- License: Fee Waived
- Installation: $600 fixed rate
- Annual Maintenance: $1,800 ($150 @ month)
