

## SPRINGER-MILLER SYSTEMS

### <sup>SMS</sup>|Host Scheduled File Export (SFE)

Springer-Miller Systems' Scheduled File Export (SFE) provides a framework to support automated, schedulable, one-way exports of data in a CSV format from the <sup>SMS</sup>|Host PMS to complimentary hospitality systems.

#### Functionality

Acting as a protective gateway to Users' systems, the SFE facilitates rapid and reliable access to files that a property wants to share with vendors or other external entities. Utilizing a flexibly configured scheduler, files designated for transport, either by naming convention or specific location, will be automatically forwarded to a validated set of SFTP credentials at the destination. This transmission mechanism accommodates the CSV export of a report, the output of a utility that has been run in the PMS or a file manually placed in a location for external transport.

#### Scheduled File Export Benefits

By employing Springer-Miller Systems' SFE, properties gain the following benefits:

- Security: increased through elimination of direct/uncontrolled external access to <sup>SMS</sup>|Host
- Protection: reliance on SFTP ensures that all files are transported in an encrypted format
- Reliability: consistent and dependable delivery of data
- Automation: fully autonomous transport processing
- Frequency: scheduling ensures files are sent when they are expected
- Economy: the SFE can support multiple vendor exports from a single installation
- Performance Safeguard: reliance on an official export protects against unintended performance degradation.

#### Low Cost

The pricing for all SFE Exports has been set extremely low in order to minimize cost considerations and encourage properties to install valid and secure Exports for all of their non-interface 3<sup>rd</sup> party services:

- License: Fee Waived
- Installation: \$600 fixed rate / Annual Maintenance: \$400

#### Software and Hardware Requirements

The product is compatible with, and requires, the following versions of Springer-Miller's software:

- <sup>SMS</sup>|Host version 22.7 and higher
- SMS Multi-Interface Processor (see Exhibit A, Rev. 5.0, Section 3, page 8 for details)
- An approved SFE with a partner system

#### Option to Output Selected Reports in .CSV File Format

Beginning with the 2022r1 release, an option has been added to generate a number of transactional and statistical reports in a .CSV format. These not only create the .CSV file, but optionally generate a text file listing the parameters used to perform the export for visual reports. Many of these can be added as Tasks to the Automated Night Audit and more will be available in upcoming releases. The contents of the Back Office File Transfer Interface and the Smith Travel Research Statistical Export are also supported for use with an SFE.

- Out-of-Order Listing (R-R-1-I-1)
- In-House Rates Report (R-R-1-D-R)
- Aged Receivables (R-R-2-G-A)
